- 1" brass pipe and 1" MIP Inlet
- Dedicated 1/4" stainless sampling bibb
- Lockable powder-coated cast-aluminum enclosure (option to cast your own logo)
- Protective vinyl cap for sample nozzle
- Can accommodate any bury depth in 6" increments
- Optional pedestal up to 3' (pictured)

Create a Custom Design!

Special powder coat paint, boxes with logos, pedestals, and more!

ECLIPSE NO. #88WC-SAMPLING STATION

Sampling Stations shall be _____' bury, with a 1" MIP inlet, and a 1" FIP discharge. A 1/4" bent-nose sampling bibb shall be located before the discharge.

All stations shall be enclosed in a lockable, nonremovable, aluminum-cast housing.

When opened, the station shall require no key for operation, and the water will flow in an all brass waterway.

All working parts will be of brass and stainless steel, serviceable from above ground with no digging.

A 1" ball valve will control the water flow, and be located after the sampling bibb, as manufactured by Kupferle Foundry, Model #88WC St. Louis, MO 63102.
