

LIMITED WARRANTY

The Kupferle Foundry Company, St. Louis, MO warrants that its Manual Hydrants/Blow-offs, Dedicated Sampling Stations and Yard Hydrants products are warranted to be free from defects in workmanship and material for a period of one (1) year from the date of purchase when operated under normal use and circumstances and maintenance service. Intelligent and Automatic Flushing Station products are warranted to be free from defects in workmanship and material for a period of three (3) years from the date of purchase when operated under normal use and circumstances and maintenance service. Kupferle's standard warranty does not include cosmetic or superficial attacks to a hydrant's/station's surface as a result of exposure to airborne sea salts at or around marine environments. However, Kupferle still warrants the functionality of the hydrant/station and offers powder coating and E-Coating options for parts which can greatly increase life expectancies in corrosive conditions.

Kupferle will repair or replace any part(s) if, in our judgment after inspection by a Kupferle representative or distributor, they are deemed defective. Any part claimed to be defective must be returned to us, freight prepaid. An RMA (return material authorization) form must accompany any complete unit being returned to our factory for inspection. We assume no responsibility for payment of transportation charges incurred as a direct result of the repair or replacement of any part alleged to be defective. Unless specified with the manufacturer's name and part number, we will provide our standard purchased non-Kupferle Manufactured hydrant accessories, including, but not limited to; nozzle caps and chains, nozzle reducing adapters, cam & grove quick disconnect adapters and stop valves, etc. These products, not manufactured by Kupferle sold as additions or substitutions to our standard warranted products are sold without any expressed or implied warranty.

This Limited Warranty shall be void if the hydrant or part(s) have been altered, subject to misuse, impact, or other condition for which it was not designed, or damage caused by the physical or chemical properties of water or liquids used in the hydrant.

The Kupferle Foundry Company will not be responsible or liable for any loss or damage to any person or property, or similar loss, which may result, or claimed to have resulted from defect in workmanship or material of any hydrant or part.
